About us

AES is an Australian-owned, Melbourne run company established in January 2001 to provide services to business, government and non-government sectors to meet the increasing demand for high quality specialist ecological advice. AES offers a full range of ecological consulting and ecological research services and has staff and associates with international consulting expertise in a wide range of habitats including wetlands, farmland, offshore marine and coastal systems.

AES has extensive research expertise and prides itself on a strong team-oriented approach and careful project management. Projects are tailor-designed and flexible enough to adapt to the evolving client needs. Solving problems through rigorous application of professional practice in ecology have been key to AES's success.

Assurances

AES will provide an independent service with a high level of quality assurance. Projects are tailor-made to meet individual client's needs and operate to standards of scientific best practice. An important element in AES's project management is regular progress reports and a final report that is concise, intelligible and consistent with agreed objectives and deadlines.

AES carries full professional indemnity and public liability insurance and adheres to a professional code of conduct and company occupational health and safety and quality assurance policies.

Director Qualifications

Simon Mustoe is Principal Ecologist and Director of AES. For over nine years he has been applying qualification and experience in ecology to managing commercial development projects. He has been appointed to manage many large consultancies for environmental assessment, requiring the management at times of up to a dozen staff. He previously worked for the consultancy Ecoscope Applied Ecologists in Cambridge, UK where he was responsible for a wide range of projects in different terrestrial and marine habitats. Simon has professional experience in Europe, Africa, Hong Kong, Australia and the UK.
